

Impinj, Inc. is a semiconductor and RFID company whose patented Self-Adaptive Silicon® technology enables two synergistic business lines: high-performance RFID solutions and semiconductor intellectual property (IP).

Impinj is the leading technical innovator in developing UHF RFID solutions for both item-level and supply-chain tagging worldwide. Impinj draws on its technical expertise and industry partnerships to deliver the GrandPrix™ RFID solution comprising high-performance tags, readers, software, antennas, and systems integration.

Impinj also licenses innovative IP products to leading semiconductor companies worldwide, allowing them to seamlessly integrate crucial nonvolatile memory (NVM) alongside analog and digital functionality on a single chip.

Impinj's IP products include the popular AEON® family of embeddable cores, which provide rewriteable NVM technology in logic CMOS manufacturing.
